idcard software

IDSnap cardmaker is an easy to use system for producing Photo Identification Cards.

Organisations take photos and enter details on site using our software. This information is then sent via the Internet to us for printing onto plastic cards. By using IDSnap you save on expensive printer costs, save labour time and reduce errors on your cards.

- step 1 > choose the source of the photo. eg digital camera, scanner, existing file etc.
- step 2 > decide what part of the image you want to appear on the ID card.
- step 3 > select from a number of pre-defined contrast and brightness settings to ensure the best looking result.
- step 4 > enter details, eg name, title, expiry date, number etc.
- step 5 > a preview of the finished card is displayed. If you are satisfied select finish. If the details need editing, return to step 4.
- step 6 > select "send card" and the cards are sent to us via the internet for printing.

FINISHED! card will be couriered to your door within 24 hours!
