# wristbands

Tyvek wristbands can be custom printed to suit your crowd management requirements. Coloured custom printed wristbands are a great method of visually identifying your paying customers. Wristbands can also be used for special privileges, catering, age ID, in fact any application where a simple, effective means of visual identification is required.

## Coloured wristbands

- > Made of strong, waterproof, lightweight Tyvek®, our wristbands can easily be adjusted to any size, and the adhesive strip is simple to use.
- > We carry a range of colours in stock, and can also have them custom printed with your logo, text or even bar coded. Call or contact us for a quote.
- > All of our stock wristbands are pre-numbered for ease of control.
- > Tyvek® Wristbands are virtually tamper proof, due to a series of die-cuts at the point of adhesion.
- > ID Solutions Wristbands measure 25mm wide and 254mm long and are available in a wide range of colours. The minimum order for custom printing is only 1000 and can be supplied in 3 weeks time.

## Plain Vinyl Wristbands

- > These wristbands are made of 3 layers of vinyl, fused together, with a male/female snap and adjustable holes to fit various wrist sizes. The outer layer gives strong colours, the middle layer makes them tough and non-stretch, while the inner layer is a smooth soft vinyl for comfort on the skin. For safety reasons, the bands will break when strong force is applied. They are available in a wide range of colours.

## Silicone wristbands

- > Silicone wristbands are a cost effective way of advertising. We can supply debossed, embossed or printed in a huge range of colours. Wristbands carrying your company's details or message are an extremely effective promotional tool.
