# AN INNOVATIVE ID CARD PRINTER TECHNOLOGY LEADER

IDP, a leading global manufacturer of SMART ID Card Printer, provides a trusted secure ID card solution with over 58 countries worldwide.

With more than 15 years, IDP engages in the development, design, and manufacture of ID Card printer enabling high performance with the latest mechanical, electronic, and software technology & support.

Our success has been grounded in our expertise in our industry.

IDP Card printers provide a complete range of (or comprehensive) printing solutions for a desktop color printer, laminating, laser engraving card printer, and all encoding options such as magnetic stripe and contact and contactless smart card.

These printers are used everywhere needed plastic cards such as employee badges, student IDs, payment cards, access control cards, customer membership, and loyalty cards, etc.,

As a pioneer of SMART card printing technology, our goal is to make plastic card printing widely available, offering business users the best-action guidance on-demand project, and to be future-ready leaders in the industry.

We look forward to your continued interest and trusted partner relationship with you.

## smart SERIES

**SMART SERIES :** The IDP SMART series card printers, engineered direct dye-sublimation method, are used a wide range of plastic card markets including commercial and government applications. SMART series is designed for producing user-friendly, flexibility, and high-quality Photo ID cards, with models ranging from entry-level to professional.

Printers are available in single or dual-sided print and with many additional features, including flipper, lamination modules, ethernet connectivity, and various encoders such as magnetic stripe, contact, and contactless. The enhanced FINE™ Imaging Technology of the SMART series enhances you to experience brilliant, full-color images. There is a SMART series to meet all your business needs;

Employee IDs, Banking cards, Membership cards, Access control badges, Government credentials credentials, and much more.

### TECHNOLOGY

- \_ Clear printing by FINE™ Imaging Technology
- \_ Instant direct heating mechanism for lamination \*Patent
- \_ Field upgradable options for dual sided printing and laminating
- \_ Field upgradable encoders for magnetic stripe, contact and contactless smart card
- \_ Automatic ribbon recognition and no need for sensors & motors calibration
- \_ Eco-friendly rewritable printing (SMART-31R)
- \_ 500 cards & scratch free (SMART-70) \*Patent
- \_ High-durability: Metal frame & shaft, all bearing (SMART-51 & 70)

### SOFTWARE

- \_ SMART SDK, to develop customized applications
- \_ SMART Utilities, to check working states and adjust configurations
- \_ Smart ID for designing and issuing cards
- \_ On-Line technical support

### CONVENIENCE

- \_ User-friendly design for desktop environment
- \_ LCD & LED for status display of printer
- \_ Easy Thermal Print Head (TPH) replacement
- \_ Front input and output hoppers (SMART-31 & 51)
- \_ Drop-in ribbon cartridge (SMART-31 & 51)
- \_ Full modular design (SMART-70)
- \_ Drawer type ribbon cartridge (SMART-70)

### EASY ISSUING

**SMART IDesigner** ensures appropriate card issuance and data management with SMART series printers at no extra cost. This application allows you to design and issue a desired card conveniently. It can be easily used with simple essential functions. Also, it is designed for advanced users to use a variety of detailed functions.

- \_ SMART series has a password verification function to provide administrator and user authentications.
- \_ SMART series can set a specific authorized PC for encoding and printing cards.
- \_ SMART series can encrypt data transmitted on USB and can support SSL (Secure Socket Layer) protocol on ethernet communications.
- \_ SMART-70 series is equipped with physical lock and Kensington lock system on each station to increase security.

### POWERFUL NETWORKING

**SMART Series** can utilize the network printer server for encoding and printing cards.

# smart 70

The SMART-70 is a high-performance large capacity ID card printer designed with a unique modular concept that can support various printer configurations to meet the users needs. As seen below, each module is a separate component that is easily attached and synchronized to deliver the perfectly printed and or laminated card. Ideal applications include University ID's, student badging, secure credentials, access control badges, school photography, K12 school IDs, print bureaus, loyalty cards, and more. Virtually any application where the user demands high capacity and high speed printing are well suited to the SMART-70 Series.

Specialty applications such as duplex monochrome, scratch-off personalization, and ultra-high speed (9.9sec YMCKO) can be accommodated with IDP's SMART-70 Dual Printer configuration.

### INPUT HOPPER

To disperse the weight of the stacked cards, the card mallet pushes cards to the weight dispersion point and the lowest card is drawn out by hook. This process prevents the stacked cards from making scratches on the lower card's surface.

### OUTPUT HOPPER

When a card is put in the output hopper, to protect the card's surface, the loaded cards are raised by the support beam which is operated by the internal CAM.

Single-sided SMART-51(51S) can be transformed into a dual-sided printer(51D) or into dual-sided printer with laminator (51L) by applying Flipper module or Laminator module at the back of the printer which can be easily installable. SMART-51 Laminator is a good option for printing and laminating at the same time which enables to produce extra security long-life ID cards with customizable security patch films. With DLW (Direct Laminating in a Wink) technology, SMART-51 Laminator ensures the most stable & fast laminating with premium quality protection for ID cards.

## TECHNOLOGIES FOR PRINTER

### 1 PLASTIC CARD PRINTING

Plastic cards are prevalent in our daily lives, such as payment cards driver's licenses, membership cards and employee identification badges. Their standard size, portability, and durability make them the ideal choice for many applications.

### 2 LAMINATION

Lamination uses polyester film onto a card's surface to protect it from heat, pressure, wear, tear and to fight adhesive things. The film is applied to card at a high temperature.

### 3 UV PANEL

The UV Panel is an advanced form of panel for security that shows a fluorescence image with UV light. It is cost-effective and an easy way to protect fake cards. To prevent counterfeit, some ID cards include a UV watermark which is only visible under the UV light.

### 4 ENCODING

Encoding is one of the important functions in ID card printer. We issue ID card not only for visual identification but for storing some information. There are three major encoding methods such as magnetic stripe, contact IC and contactless IC. IDP Card printer supplies all kinds of encoding options together with the picture quality printing.

## MULTIPLE HOPPER

Multiple hopper system for SMART-70 is designed to fit the needs of large capacity with high efficiency for Kiosk operation. From minimum 2 to maximum 6 large capacity 500 cards hoppers can be used depending on the user environment. Monochrome ribbon supports up to 3000 prints minimizing maintenance cost and time and up to 3000 cards loadable hoppers with 6 different types on each hopper will maximize the efficiency of Kiosk application. Advantage of SMART-70's unique full modular design makes it possible to add Encoding module and Laminating module. Full metal structure of the multiple hopper system is ideal for high volume issuance environment.

## SMART IDesigner

IDP SMART IDesigner Software makes it easy for you to design and print professional ID badges and a multitude of other plastic card needs at your fingertips.

SMART IDesigner allows you to add images, text, barcodes, manage databases and provide card encoding options.

Our SMART IDesigner software comes with the SMART printers free of charge and can be used to design and print ID cards, ID badges, and more.

- Design and print (Image, Photo and Text)
- 1D & 2D Barcode printing
- Autoportrait (Auto face detection, adjustment of size & position)
- Printing of sequential numbers
- Card design templates
- Capture live photos by connecting a camera which will be stored in the cardholders' record.
- Plug-in for supporting external devices (Sign pad, Camera, Scanner)
- Convenient card issuance and data management
- Magnetic stripe (MS), contact & contactless smart card encoding by using plug-in program
- Multi-language support

## APPLICATIONS

### PRINTING SOLUTION IN VERTICAL MARKETS

IDP card printers help business identity and on-demand security more efficiently, we provide solutions everywhere is needed plastic cards such as a corporation, financial, education, government, and healthcare, etc.

#### CORPORATION

IDP offers an extended range of printers that will meet the identification and security requirements of all organizations.

#### FINANCIAL

Banks are establishing instant credit or debit card issuing system instead of centralized issuing system. In this case, customers do not need to wait till their financial cards are issued.

#### ACCESS CARD

Access control card has many objectives, including controlling access to door and gate, enabling users to sign documents electronically, and enter controlled facilities with magnetic stripe, contact and contactless smart card.

#### EDUCATION

Most of all educational organizations need student ID cards. IDP ID card printer is suitable to issue all kinds of student ID card.

#### GOVERNMENT

All of official ID cards have powerful security functions and abilities to fight forgery attempts, as well as wear and tear. IDP card printer provides high security function and durability

#### TRANSPORTATION
